ON TREND AND SUSTAINABLE

Paper Straws are quickly becoming popular as a way to replace plastic straws and reduce the impact they have on our marine environment.

Our straws, wrappings and outer packaging are biodegradable and compostable, minimising harm to our planet.

At **Devarsh Paper Products** we are providing paper straws that are made in India, non toxic and SGS approved. Paper straws are a much better choice for the planet as they can decompose without creating a waste problem. The **Devarsh Paper Products** Green ware range of paper straws is not printed with any inks which keeps them food grade and non toxic.

We are bringing in the paper straw revolution by getting most cafes, restaurants and hotels to ditch the plastic and switch to paper.
